CONTACT gstt.ICFP@nhs.net

What is it?

The **Dual International Clinical AI Fellowship** is a 12-month programme in London that integrates **two parallel placements in world-class London hospitals**. It combines the *NHS Fellowship in Clinical AI* with a clinical attachment through the *GSTT International Clinical Fellowship Programme (ICFP)*, building knowledge and skills in two complementary domains:

- **AI adoption in healthcare** through the NHS Fellowship in Clinical AI
- **Clinical expertise** through the GSTT International Clinical Fellowship Programme

How to Apply

STEP 1

Apply to the GSTT ICFP first

Contact the [GSTT International Clinical Fellowship Programme](#) and confirm your eligibility.

STEP 2

Apply to the NHS Fellowship in Clinical AI

Complete the International Application Form at www.nhsfellowship.ai/international.

Please note: The International Clinical Fellowship Programme is certified by the UK General Medical Council. For the Dual International Clinical AI Fellowship, we do NOT accept self-funded applications. All applicants require the support of their overseas employer, government or other sponsoring body.

Key Information

Programme Component	NHS Fellowship in Clinical AI	GSTT International Clinical Fellowship
Placement Summary	Attachment to a clinical AI project embedded in a multidisciplinary NHS team in London, supervised by NHS clinical AI experts. Monthly taught workshops across NHS centres of excellence, including an intensive introductory event.	Structured hands-on clinical training across our main hospitals in London, developing the advanced skills and knowledge required to practise independently as a specialist.
Time commitment	August 2027 – August 2028 (Cohort 6). Fellowship starts 11 August 2027 . Minimum 0.4 FTE (2 days a week) on the NHS Fellowship in Clinical AI. The weekly split is 4 weekdays clinical and 1 weekday + 1 weekend day on AI. This is tailored to each fellow with the faculty.	
Good to know	• No coding or AI experience is required. • For sponsored international applicants, recruitment is not competitive, but participants must meet the Essential criteria at interview. • No project idea needed: rank projects proposed by NHS AI supervisors. International applicants join the London AI project pool unless specified otherwise.	
Cost	80,000 GBP

NHS Fellowship in Clinical AI

Successful adoption of clinical Artificial Intelligence (AI) technology does not happen by accident. It is driven by clinical professionals with specialised knowledge and skills.

The [NHS Fellowship in Clinical AI](#) is an established UK programme which **trains clinical professionals in the specialised knowledge and skills to adopt and evaluate AI technology in healthcare** safely and effectively.

The fellowship strongly emphasises practical AI project experience under expert supervision. Projects involve real-world deployment and evaluation of AI technology in the UK National Health Service (NHS). Interactive teaching is delivered by world-class leaders in clinical AI to enhance these practical experiences.

This fellowship is recognised in the [NHS Long Term Workforce Plan](#) as a flagship training programme to maximise the benefits of clinical AI technology.

"I greatly value the opportunity to learn from world-renowned faculty directly at the coalface of clinical transformation"

Dr Gerald Sng (2026)
Consultant Endocrinologist, Singapore
NHS Fellow in Clinical AI, Cohort 5

"I am thrilled to join this prestigious fellowship. I have always been drawn to its outstanding reputation, and I am eager to gain invaluable experience"

Dr Enas bin Araik
Consultant in Geriatric Medicine, Saudi Arabia
NHS Fellow in Clinical AI, Cohort 4

Key Benefits for Sponsors

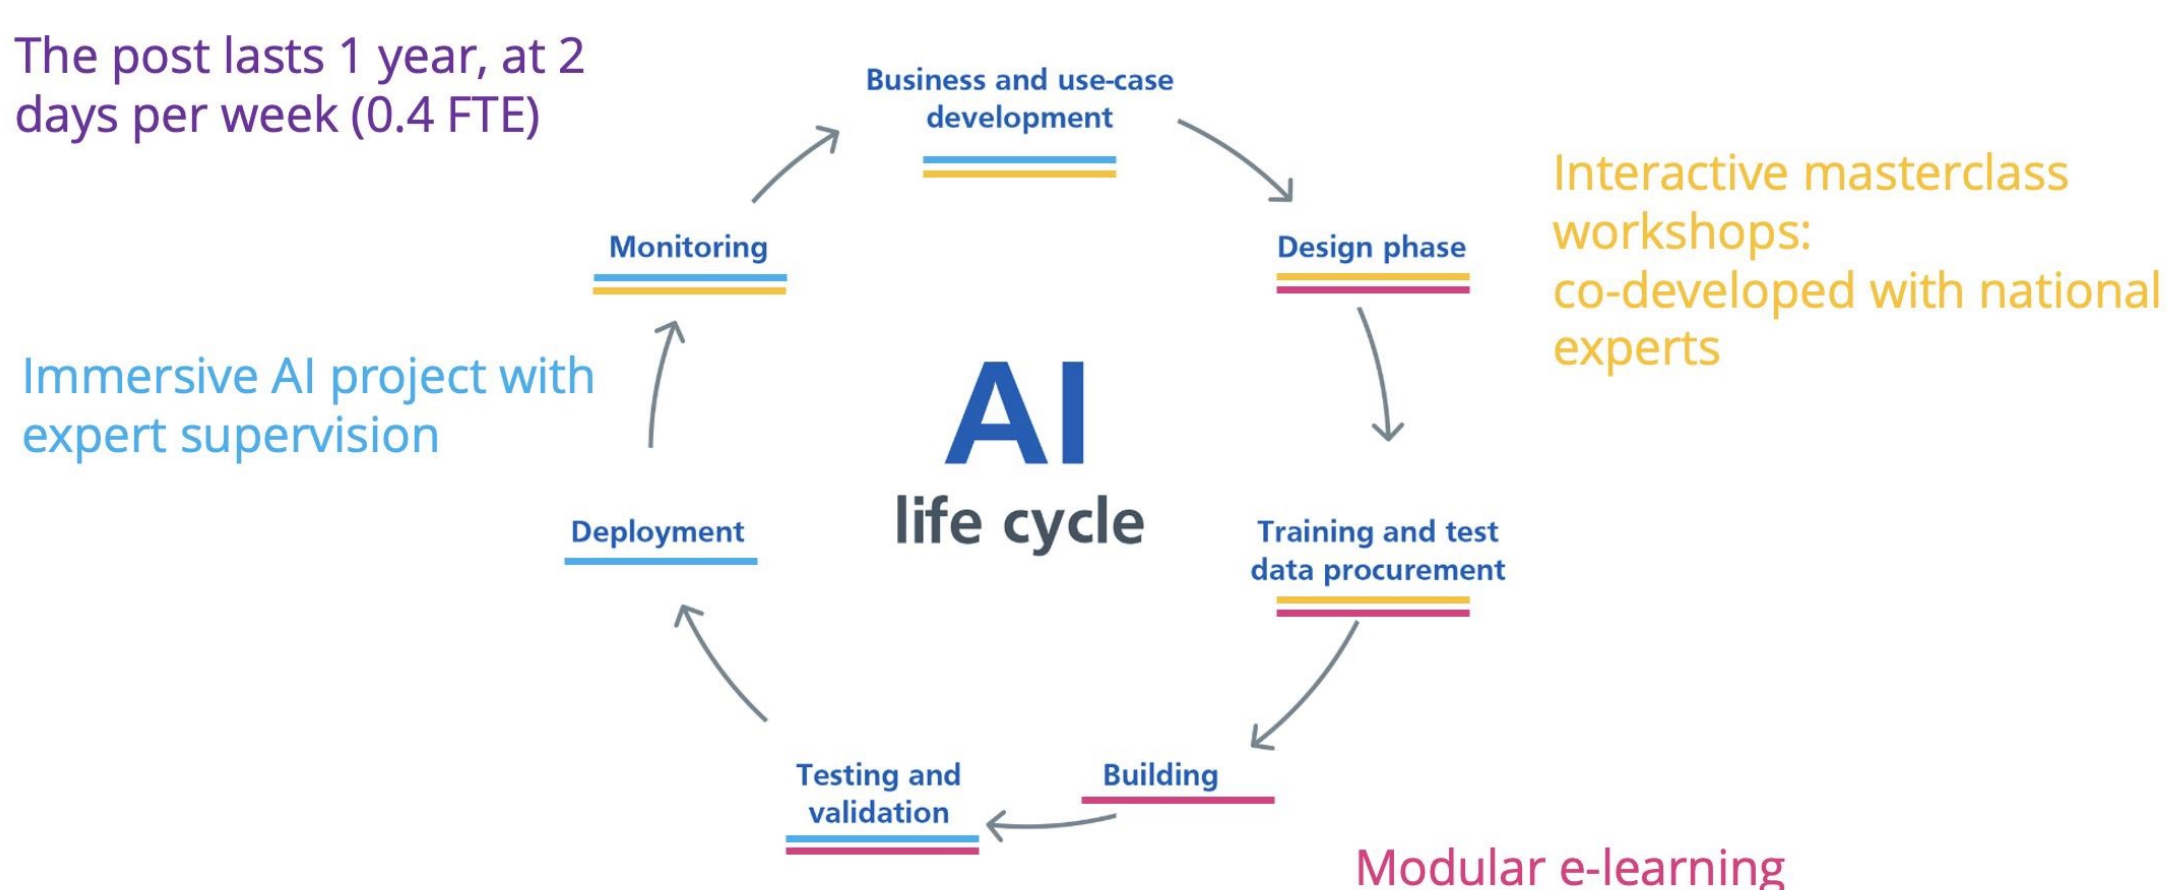

WHO BENEFITS	WHAT SPONSORSHIP DELIVERS
The fellow	Prestigious career development opportunity for clinical professionals - Fellows gain a valuable skillset at the unique intersection between medicine and AI, delivered by a world-class faculty. - Improve the retention and job satisfaction of top-tier clinical talent through a prestigious career development opportunity in a high-profile UK hospital. - Fellows are connected to ready-made professional networks in international centres of excellence for collaboration in clinical AI research and innovation.
The regional workforce	Strategic regional workforce development - Create a cohort of clinical AI subject matter experts who can align to and deliver bespoke regional priorities for digital healthcare transformation. - Fellows return to the regional workforce as leaders and educators, equipped to disseminate knowledge and skills to peers and lead specialised clinical AI delivery teams modelled on their fellowship experience. - Position your regional workforce as early adopters and key opinion leaders in clinical AI, able to influence the conversation as experienced stakeholders.
The healthcare system	Enhanced regional capacity for AI-driven healthcare delivery - Realise the transformational benefits to improved efficiency, personalised healthcare, and population health with AI technology. - Future-proof your workforce against the substantial system shock anticipated from the AI transformation of healthcare systems.

Sponsors of international applicants should [contact the faculty](#) as early as possible to discuss arrangements.

NHS Fellowship in Clinical AI: Curriculum Overview

The NHS Fellowship in Clinical AI delivers an educational programme covering the full life cycle of AI technology in healthcare. The curriculum is delivered through multimodal teaching methods reflecting modern principles for adult learners, and is aligned to key capability frameworks from *NHS Digital Transformation*, *Health Education England*, and the *NHS AI Lab*.

The post lasts 1 year, at 2 days per week (0.4 FTE)

Clinical AI Project Placement

- Each fellow is assigned to their choice of AI project, embedded in a multidisciplinary team to deliver AI deployment and evaluation in real NHS clinical workflows.
- Fellows work on these AI projects under the supervision of world-class clinical AI experts.
- Fellows are supported to publish and present scientific output related to their project.

Interactive masterclass workshops

Teaching is delivered via monthly full-day intensive workshops by national and international experts from:

- **Academia** e.g. *Oxford University, King's College London, Imperial College London*
- **Industry** e.g. *Microsoft Health, Newton's Tree, Skin Analytics*
- **NHS** e.g. *CERSI-AI, OXCAIR, GSTT Clinical Scientific Computing*
- **Policymakers and regulators** e.g. *NICE, MHRA*

Networking

- Fellows form a rich multiprofessional network through interactions with other NHS and international fellows, the faculty, AI project supervisors, and lecturers. In their future careers, this active and thriving alumni community will be a resource for collaboration and knowledge-sharing.

Modular e-learning

- Remote learning complements practical experience by enhancing technical understanding of AI fundamentals and programming.

Applications for Cohort 6 open 5 October 2026
